Wall Spring Box (WSB)
& Ceiling Spring Box
(CSB)

DESCRIPTION

The External Cable Operated Dampers work great with the use of a Wall or Ceiling Control Box. The external control cable of the COD can be routed to any convenient location and secured to this control box. The Control Boxes feature a strong plastic housing so they can easily be secured inside of concrete or wood and can lay flush to the mounting surface. When needed, the concealing cover plate can be removed to provide access for adjustment to the COD cable.

For use with External Standard Cable Operated Dampers
